Outsourcing public health laboratory services: A blueprint for determining whether to privatize and how
Avery, George
Public Administration Review v60n4 PP: 330-337 Jul/Aug 2000
ISSN: 0033-3352 JRNL CODE: PAR
WORD COUNT: 6378

...DESCRIPTORS: **Government** agencies

...ABSTRACT: do business, the outsourcing of services has become a popular tool, particularly as resource constraints **limit** options available to **governments** . This article suggests a process for the evaluation of an option to outsource laboratory services. It suggests that, prior to contracting or privatizing services, the concerned **agency** should evaluate: 1. the impact on the **agency** 's core mission, 2. the availability, stability, and reliability of private sector service providers, 3...

...TEXT: do business, the outsourcing of services has become a popular tool, particularly as resource constraints **limit** options available to **governments** . All too often, the decision is made, for reasons of ideology or resource constraints, to...

...without giving careful consideration to the impact of privatization on the core missions of an **agency** , or whether privatization, in fact, offers real cost savings. Purchasing tools designed for traditional commodity...

...to outsource laboratory services. it suggests that, prior to contracting or privatizing services, the concerned **agency** should evaluate: the impact on the **agency** 's core mission

the availability, stability, and reliability of private sector service providers

the relative...

...transportation infrastructure, also require more specialized data than was available in the mid-nineteenth century. **Governments** have responded to these needs by creating laboratories to collect the data needed. Today, a typical state **government** has laboratories that test medical specimens for diseases such as AIDS or tuberculosis, water for...

...used to lay down highway striping.

State laboratories typically play a variety of roles in **government** beyond the actual laboratory sample or specimen. A **government** that plays a role in specialized, technical areas requires access to expert advice and technical...

...over into public health, threatening the laboratory network and the ability of the public health **agency** to manage potential threats to the health of the population.

In the 1990s, twin themes...

...care system into the realm of managed care, where price-fixing by managed care organizations **limit** reimbursements in particular for clinical laboratory services. At the same time, public confidence in the ability of **government** agencies to accomplish credible goals and respond to public needs has been shaken.

Management reform in public agencies, spurred by the publication of Osborne and Gaebler's **Reinventing Government** (1992), and the subsequent volume **Banishing Bureaucracy** (1997), also drive the move towards privatization. **Reinventing Government** emphasizes the use of competition to improve the efficiency and effectiveness of service delivery. Osborne...

...to improve the quality and effectiveness of services" (Yergin and Stanislaw 1998, 358).

Although **Reinventing Government** focuses on the act of competition as the mechanism for reform, the translation into practice...

...loss of faith in public institutions—a belief that the monopoly status of the public **agency** renders the **agency** unresponsive to public needs. Outsourcing based on the ideal of public non-competition assumes that... that competition from the private sector spurs improvements in the business practices of the public **agency** , and vice versa.

Ideally, the job of the administrative **agency** should not be to set public policy, but to administer it in the most efficient...

...provision of support services when those services are best, and most efficiently, provided by the **agency** . The best value is often not the cheapest in dollar terms. As James Q. Wilson...

...346-64), four standards exist for evaluating alternatives for service delivery: efficiency, equity, accountability, and **authority** . All of these need to be considered in the planning process.

Public Health Laboratory Services

The expansion of **government** opened the door on policy issues that are more technical and specialized than ever before...

...adulterated food and medical products led to the regulation of these and other products by **government** agencies such as the Food and Drug Administration. Concern over pollution led to environmental regulation...

...what caused the disease or disorder, rather than treating the case. Ideally, the public health **agency** will find the causative factor and deal with it before the disorder occurs (Anderson et...

...of a private sector laboratory is quite different from the core task of a public **agency** , and this can affect the ability of the public health **agency** to implement policy. For example, when private sector clinical laboratories are involved in the diagnosis...

...focus is on the management of the disease in individual patients, while a public health **agency** concentrates on management and control in populations. The latter may require organization of patient results...

...on the public health role. Their ties to the insurance, particularly the managed care system, **limit** their flexibility in providing public health

services. For example, testing of asymptotic subjects is likely...to controlling a serious public health threat, and hence to the core mission of the **agency**, the public sector may find that it has no alternative but to provide the service...

...Where efficiency is the strongest determinant, the private laboratories can be effective. Where accountability and **authority** are required, the public laboratory may very well be the provider of choice. As Wilson...

...CLIA), designed to regulate rote diagnostic testing and misapplied to the environment of public health, **limit** the ability of laboratories to do public health work. The existence of private diagnostic and public health **agency**, others are not, and can be safely outsourced. Even for those that need to be...

...future needs, excess or underutilized resources, and unnecessary inefficiencies in the business practices of the **agency**. Properly used, these tools improve the quality and value of the service delivered to the ...

...services required for the surveillance and protection of the health of the population is preserved.

Government Purchasing Systems and Specialized Services

Friederich Hayek noted that "the function of competition is here...

...a position to be served as well as we are." (Hayek 1948, 97).

The typical **government** purchasing system, developed for the acquisition of bulk commodities and services such as office supplies...

...Osborne and Gaebler 1992, 76-9).

Model Policy for Outsourcing Laboratory Services

Responsible management of **agency** laboratory services requires the careful use of a number of evaluation tools in order to...

...services are vital to the success or failure, as well as the efficiency of the **government** efforts. Experimentation is underway in this area. Michigan has criteria in place for the evaluation of privatization services through the Michigan Commission on Total Quality **Government**. Joseph McDade and ...of the data generated by the provider, and impact upon the core missions of the **agency**. The purpose of the review process is to identify the most effective way to meet the policy goal of protecting public health. Without an ongoing review process, the **agency** lacks the basic tools to assess its programs, needs, and services.

An **agency** with significant service needs should establish a small staff to support the review process and...

...including costs associated with contract monitoring and bidding and conduct an on-going review of **agency** testing policies, and evaluate the effects of the projection on the baseline capacity of the...

...resource use, it is very possible that an outsourced test could end up costing the **agency** more than if performed internally. When considering **agency** needs for laboratory services, the evaluators need to consider critical issues regarding the services. First, the services in question should materially assist in forwarding the **agency**'s

core mission, and the **agency** should be the appropriate one to provide the service. Second, the **agency** must maintain a baseline laboratory capacity and infrastructure to respond to mission needs, and maintain...

...contractor default. Third, the testing must be consistent with the legal requirements placed on the **agency**. An **agency** involved in drinking water quality regulation, for example, must maintain sufficient laboratory testing capacity to maintain SDWA primacy requirements. The **agency** remains accountable for meeting mission requirements; therefore those requirements should be a priority (McDade and...

...to ensure an accurate comparison of the costs of internal and external testing activities. The **agency** must account for all costs of the decision. It is not enough to compare the...

...required capacity. A simple comparison of the cost of the test conducted within the public **agency** and the charge by a private sector service provider can ignore significant costs associated with...

...the taxpayer if the outside contractor cannot reliably meet the needs of the program.

The **agency** should establish a system of performance monitoring and feedback from users and service providers. It...

...developed between the laboratory, public or private, and the internal clients, defining data quality and **service** objectives. For **monitoring** external providers, a team of contract monitors will need to be formed who have sufficient...

...experience to audit data quality to ensure contract fulfillment. In some programs, such as drinking **water** quality regulation under the Safe Drinking **Water** Act, this is already a legal requirement. (40 CFR 142.10(b))

The effect of...

...enforcement action, then the test should be performed in-house to assure data integrity. The **agency** must implement safeguards to ensure that contractors provide acceptable chain-of-custody documentation, records confidentiality...1

Figure 2 Checklist for Evaluating Laboratory Services

1. What data is required by the **agency** ?
2. How will the data be obtained? Does it require laboratory analysis?
3. Is this activity appropriate for the **agency** ?
4. What volume of testing will be required?
5. How critical is the data to be generated to the **agency** 's core mission?
6. What legal requirements arise from this activity?
7. Will this be...

...Figure 3 Checklist for Evaluating Sources of Lab Services

1. What baseline capacity must the **agency** retain? Will privatization affect this capacity?

2. Does a private sector capacity exist? Is it adequate for **agency** requirements?

3. What are the total costs of internal testing versus outsourced testing?

A. Can...

...How do the providers assure the comparability of data they generate?

14. How will the **agency** handle testing in the event of the failure of a provider?

How to construct a service quality index in performance-based ratemaking
Alexander, Barbara R
Electricity Journal v9n3 PP: 46-53 Apr 1996
ISSN: 1040-6190 JRNL CODE: ELJ
WORD COUNT: 4342

...TEXT: service quality concerns. If a commission lacks statutory authority to assess fines or penalties for **violation** of its rules, the void created with the elimination of base rate cases effectively vitiates ...A. Performance Measurement Categories

What should be measured is a function of the type of **utility**, its previous record on customer service compliance, current "hot-spots," existing state statutes and regulations, and the availability of the **utility**'s historical data. However, most **service** quality monitoring plans include selections from the following types of customer service measurements:

1. Customer Satisfaction. Utilities...

...could be included in this category are billing error rates (percentage cancel and rebill) and **violations** of commission rules determined by commission-sponsored audits.

3. Service Reliability. Customers expect continuous and...

...Duration Index (CAIDI); and Customer Average Interruption Frequency Index (CAIFI). Telephone utilities have not routinely **monitored service** outage in a meaningful way, i.e., as a function of number of customer affected...

...number of services affected. However, the Network Reliability Steering Committee has developed a proposal for **monitoring** telephone **service** reliability that shows great promise.(8) The Maine Commission has required NYNEX to devise such...by the fact that the phone center that handled their complaint answered promptly. Utilities that **violate** commission rules cannot offset that **violation** by compliance with another one.

4. The U.K. Experience. The United Kingdom privatization of its electric utility industry was accompanied by close **monitoring** of **service** quality. Specific service quality requirements are established by the Director of the Office of Electricity...on service quality compliance is significant.(17) This approach has the advantage of targeting the **utility** penalty dollars to those directly affected. Several states have taken this approach to the US West service quality debacle. For example, the Colorado PUC requires a telephone **utility** that fails to keep an appointment for installation of new or upgraded service by more...

...third of the installation fee. A rule change is also pending which would require the **utility** to provide alternative service, including vouchers for cellular service, when a new installation order is...

...compel it to improve its performance.

4. See, e.g., US West Accused of Service **Violations** , GAZETTE TELEGRAPH, Sept. 29, 1994; Balky Phone Service Again Bedevils City, ARIZONA DAILY STAR, Oct...

... enforced by the "Authority Having jurisdiction" (AHJ). This term applies to any inspector or inspecting **agency** having jurisdiction over the electrical installation. Usually such authorities are electrical inspectors in some form...

...by NFPA, goes before the NFPA membership at the Annual Meeting, where there is a **limited** opportunity to differ from the results of the NEC Committee work. At times significant changes...

...fall within its provisions, particularly with regard to utility-owned site lighting. EC&M tip: **Watch** out for conflicting interpretations over when electric utility-owned and maintained conductors and utilization ... were listed for that temperature, which is very unlikely). Sec. 110-14(c)(1) normally **limits** this kind of termination to 60 (degrees) C. According to Table 310-16, No. 10...conductor ampacity for welders, with the receptacle configuration rules in this section. EC&M tip: **Watch** the special rules in Art. 630 that apply to these circuits. For example, the 50A...

...any way out of providing common-area distribution equipment where there are common-area lighting, **alarm** , or other circuits in multifamily housing. What happened: The requirement used to be in Sec...the maximum load. Background: Although a one-year database is often available from utility demand **records** for the **service** , that won't be useful in cases where an existing feeder may be proposed as...

...220-36. The demand table for new restaurants has been dramatically revised. EC&M tip: **Watch** out for the format of this new table, because it differs from most other demand...circuits with no line-to-line load can still use single-pole Cbs, except where **limited** by Sec. 210-4(b). That subsection requires multiwire circuits supplying multiple devices on a...

...protective device(s) on the secondary side must meet normal accessibility requirements. EC&M tip: **Watch** for the expression "maximum fuse size" on listed Equipment. It means the equipment was tested...the new Appendix C). What happened: This new exception (No. 4) to the normal size **threshold** on paralleled conductors (usually No. 1/0) allows a reduction in this **threshold** , but only for neutral conductors. The rule change may help some existing installations with overloaded...entire assembly. The signaling conductors must comply with Sec. 780-5. This latter section actually **limits** those signaling circuits not exceeding 24V (and not the conductors) to 1A where protected by an overcurrent device or an inherently **limited** power source.

Although there are numerous editorial errors in both the form of the reference...

...that Sec. 780-6(a) also covers hybrid cables, and includes the additional minimum size **limitation** of No. 24 for the signaling circuit conductors. Background: There were at least two brands...

...5(1) (1993 NEC: Sec. 336.4(a)) A new exception to the three-story **limitation** for Type NM cable now allows for renovations of attic and parking or storage spaces...impracticable. This is only for unbroken lengths, so 10 ft will be the normal distance **limit** for this exception. Background: Although "fishing" a rigid wiring method may seem incongruous, it is...

LINE COUNT: 00276

...ABSTRACT: decision making and management activities. However, an audit system must also be in place to **monitor** system utilization, effectiveness and data quality.

... address these and other challenges that will face us during the next decade.

If your **agency** is like most, administrative systems are comprised of both manual and computer record systems. The...

...value of the data reveals deficiencies in most systems as they are implemented. However, any **agency** that has embarked on a systems implementation process for infrastructure management will undoubtedly agree that...

...resources.

* Cincinnati Water Works initiated tracking of Distribution Division unscheduled work orders establishing a historical **record** of **service** requests and work performed. The **Water** Works has successfully improved the rate of capture by 20 percent over previous tracking methods...

...Agencies who understand the process of implementing and maintaining infrastructure management systems realize that an **agency** 's use of a system, as well as its continued evolution, is necessary once the...on the scope of a phased implementation of the system. Ideally each phase should be **limited** to an implementation time-frame of no more than six months with an implementation cost...

...more efficiently.

Financial Accounting. Financial accounting activities provide a means for an evaluation of an **agency** 's assets, including complete life cycle costs, depreciation calculation, and capital improvement planning and fund ...

...broad variety of systems.

Work Management. Work management functions are used on a daily basis, **agency** -wide. Valuable historical information collected through daily use provides a basis for capital program development, optimization of maintenance activities, physical condition assessment, and resource management by an **agency** . All types of work tasks performed by an **agency** 's field operations and maintenance staff can be managed within the work management functions of...allowing for the immediate display of customized screens with data relevant to a particular task, **agency** , or client. When coupled with the ability to communicate in real-time through audio and...

...records, view schematics or diagrams, and integrate the work process between the field and the **agency** , will simplify the process of maintenance management.

What Next?

In a perfect world, all the...

...software and supporting only minor enhancements to improve the use of these applications to an **agency**'s specific needs and objectives. The particular initiatives of municipal and public works and utilities...

...determine the scope of systems to support the infrastructure management process.

The commitment of an **agency** to long-term support and evolution of these tools will determine the results of future...

...by meeting system objectives and whether those objectives have been a priority in support of **agency** initiatives. Where a historical track record is established and clear benefits have been achieved, financial concerns of political decision makers are eliminated.

If one truth can be seen in **watching** infrastructure management develop it is that the future is now. All current developments have grown ...

Wireless solutions for the communications needs of utilities worldwide.

Grabacki, Tim

Global Communications, v16, n3, p24(4)

May-June, 1994

ISSN: 0195-2250

LANGUAGE: ENGLISH

RECORD TYPE: FULLTEXT

WORD COUNT: 2284 LINE COUNT: 00197

... of Asia and Latin America, the benefits of two-way communications are becoming indispensable.

The **governments** of developing power countries are privatizing many state owned companies. And this means the companies...

...solutions such as EnerConnect offer plants and compressor stations such advantages as improved security, internal **monitoring** and reliability of

alarm systems.

A wire-dependent communications system is subject to more outage difficulties in crisis situations...handling concerns such as line maintenance, construction and customer service.

The Transmission Mission - Construction, Restoration, **Monitoring**

Whether in Paris or Pittsburgh, utility companies must keep pace with the ever-increasing demands...

...and substations.

Another good example of power system assessment is visible in Mexico, where the **government** -operated Comision Federal de Electricidad (CFE) meets the demands of more than 80 million Mexican citizens throughout the country.

As a pioneering step in **monitoring** system development, and subsequently customer satisfaction, CFE developed a quality index measuring everything in the...

...specialists have at their disposal information on everything from general system status to detailed customer **service records** . In addition to voice communications, accessible data transmission has now become vital.

Utilities in particular require systems that can incorporate the technology of current systems without drastic re-vamping of existing equipment. Grabacki explains that when Motorola experts evaluate a **utility** 's communications needs, they look for ways to incorporate existing equipment and capability into the...

...To employ fixed data applications such as remote customer meter reading or distribution automation that **monitors** power surges and failures, Motorola equipment often has to communicate with hardware from older systems. Called open architecture, this compatibility can save a **utility** considerable dollars.

Imagine a company using a conventional two-way radio communications system that relies...coordinate construction crews and manage on-site plant operations such as maintenance and security. Remote **monitoring** systems will be able to check the total performance of the power network and backbone...

The power of accounting: reflecting on water privatization?
 Jean Shaoul
 Accounting, Auditing & Accountability Journal v10n3 PP: 382-405 1997
 ISSN: 0951-3574 JRNL CODE: AAJ
 WORD COUNT: 10380

...TEXT: OFWAT, 1992a).

The provision for rising real prices contrasted with the other privatized and regulated **utilities** , which had been required to reduce prices in real terms. The justification for this difference...

...privatization was being considered in the 1980s, the financial implications of EC legislation on improved **water** quality and waste- **water** treatment became apparent. It was estimated that more than Pounds 28 billion of capital expenditure would be required to compensate for years of neglect and underinvestment resulting from successive **governments** ' macro-economic policies, and to restore **service** provision to that **required** by public health and environmental standards. This estimate was later revised upwards (OFWAT, 1990) and...thereby confirmed that the shareholders had earned an above average return.

Cash from operating activities **exceeded** the expenditure on new capital equipment and infrastructure renewals over the six-year period (see...

A Balanced Approach to Residency Rules for Local Government Employees

Posthuma, Richard A.

Government Union Review v13n2 PP: 46-73 Spring 1992

ISSN: 0270-2487 JRNL CODE: GUR

WORD COUNT: 11334

...TEXT: employees advance several arguments that residency rules are unconstitutional. One claim is that residency rules **violate** the right to travel(52) protected by the equal protection, due process, or privileges and...

...rules will withstand constitutional challenges based on the right to travel.(61) However, durational rules **violate** the constitutional right of travel.(62)

The right of citizens to interstate travel has been...

...working for the city for 16 years.(67) He moved to New Jersey.(68) This **violated** the city's jurisdictional residency rule.(69) The fire fighter claimed that his right to interstate travel was **violated** .(70) The high Court held that continuing residency rules are "bona fide."(71) the Court held that the fire fighter's constitutional right of travel was not **violated** , (72) stating that, "(T)his kind of ordinance is not irrational."(73) The Court then...

...validity of durational residency rules.(77)

Nevertheless, other courts have found the durational residency rules **violate** the constitutional right to interstate travel. Several federal district courts held that durational residency rules...state interest.(81) These courts found that under the strict scrutiny test, durational residency rules **violate** the constitutionally protected right to travel.(82)

There was a similar result in a case...

...residents for at least one year.(86) The Musto court held that durational residency rules **violate** both the state and federal constitutions because they interfere with the right to travel.(87...

...city resident.(98) The court found that the employee's due process rights had been **violated** because he had not been given an opportunity to prove that he was a resident...

...service board must have "competent, material, and substantial evidence"(100) showing that an employee had **violated** the residency rule before it can discharge the employee. If such evidence is not on...

...Detroit,(102) The Michigan Supreme Court held that jurisdictional continuing residency rules(103)do not **violate** employee rights to substantive due process,(104) or equal protection.(105) The Williams court found...

...past discriminatory hiring practices.

Residency rules have been called an unfair employment practice when they **violate** Title VII of the Civil Rights Act of 1964. (112) Title VII is part of...124) Where the business justification standard is met, a facially neutral employment practice would not **violate** Title VII despite its disparate impact.(125)

However, the Third Circuit Court held that the...

...pattern, a durational residency requirement in the city of Warren, Michigan, was also found to **violate** Title VII.(128) In that case, like Harrison, the city had a pre-hire residency...

...a continuing residency rule). Thus, the court implied that a continuing residency rule would not **violate** Title VII.

The Warren decision allows a balanced approach to residency rules. On the

one...

...members of racial minority. When this has a disparate impact on a particular race, it **violates** Title VII. On the other hand, a residency rule can be a tool to remedy...

...a balanced approach to the issue of residency. The application of the rule must not **violate** estoppel principles, but the rule itself is not invalid.

To avoid problems with the application...provision for the arbitration of employee grievances. For example, an employee who is disciplined for **violating** a residency rule may file a grievance which alleges he did not **violate** the rule. In *City of Saginaw v. Saginaw Fire Fighters Association* 170 an employee filed...

...resident. (170) The employee claimed he should not have been discharged because he did not **violate** the rule. In this type of case, a grievance arbitrator may overturn the discharge and...

...Police Supervisor's Association (173) the Michigan Court of Appeals overruled a grievance arbitrator who **exceeded** his authority. In that case, the employee asked for an exemption to the residency rule...

...Nevertheless, the arbitrator granted the exception. The Michigan Court of Appeals held that the arbitrator **exceeded** this authority and that, under this labor agreement, the discretions to grant an exemption belonged ...for home rule cities was declared unconstitutional. (214) The court ruled that such a statute **violated** the powers granted to home rule cities in the Colorado constitution. (215) The court stated...

...continue.
